REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: While U. S. Patent 6,403,051 describes the same basic process for partially oxidizing hydrogen sulfide into elemental sulfur via contact with the same catalyst at the same temperatures and at the same length of time set forth in the applicants' claims, neither U. S. Patent 6,403,051 or any of the other references of record teach or suggest the supply of the oxygen-containing gas into the catalyst in at least two increments to at least two catalyst regions, in the manner set forth in applicants' independent claim 1 and the claims dependent thereon.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
